R-44 - The 4-seat **Robinson R44** is known for excellent safety and reliability, smooth handling, and superior comfort. The 2 by 2 seat configuration provides for one passenger seat in the front next to the pilot and two passenger seats in the rear of the helicopter.

R-66 - The 5-seat **Robinson R66** is equipped with a more spacious cabin and a powerful turbine engine, allowing for more weight and a quieter ride. The 2 by 3 seat configuration is similar to the R44 but permits a third passenger in the rear of the helicopter.

All seats have window views, accessible by 3 passenger doors, and the open cabin design allows for unobstructed viewing. Headsets are provided for all passengers which permits communication with your pilot and other passengers. The cabin is air conditioned and heated for maximum passenger comfort. In every aspect, Robinson products are ideally suited to providing you with a comfortable, enjoyable, and safe flying experience. All tours may accommodate up to 3 passengers (R-44) or 4 passengers (R-66). **Individual and combined weight restrictions apply.*

Adventure Seekers, tours may be conducted with the **doors off** during warm weather, inquire when booking your tour.
